

# ORDERLINESS

vs. Confusion

## Keeping things clean and neat

I choose to

- Clean up after myself.
- Put things where they belong.
- Avoid clutter.
- Not litter.
- Do things in the right order.

## Orderliness in the home includes:

- \* Planning a weekly routine and schedule for family activities
- \* Taking the time to put things back after using them
- \* Having a place for every possession and being willing to get rid of things in order to have sufficient space for everything.

## The Benefits of Orderliness

EFFICIENCY - Planning our time helps us get everything done.

PEACE - Decluttering helps us feel free and at peace.

ACHIEVEMENT - When belongings are in their place we don't waste time looking for them.

*Orderliness is knowing what to  
remove from my life and  
surroundings and having the  
courage to do it.*

### ***Personal Evaluation***

HOW ORDERLY ARE YOU?

Do you begin your day by time  
with the Lord?

Do you go to bed meditating on  
scripture?

Do you look after your  
belongings?

Do you encourage younger  
siblings to be orderly and  
attentive?

Despite their small size, magnetic termites are one of the most fascinating insects living on the tropical savannahs of the Australian Top End. Their mounds are perfectly aligned north south to catch the sun and keep warm. The mounds are rock solid to withstand the flooding of the wet season and the termites have a very orderly interior working system.

**Let all  
things be  
done  
decently  
and in  
order.**

**1 Corinthians 14:40**
